EDUCATION

The University of Texas at Dallas December 2018
B.S., Information Technology and Systems GPA 3.266

TECHNICAL SKILLS

Programming:	JavaScript, AngularJS, HTML5, CSS3, Node.js, jQuery, C++, C#, Java, Python, PHP, ABAP
Operating Systems:	Windows, Android, OSX, iOS, CentOS, Ubuntu, FreeBSD
Software:	Adobe Photoshop, SAP, Amazon EC2, MS Access, Advanced MS Excel
Databases:	MySQL, MariaDB, SQLite, MongoDB

EXPERIENCE

Tata Consultancy Services – Hyderabad, Telangana, India February 2017 – June 2017
SAP ABAP Consulting Intern

- Designed programs for use with client's SAP ERP system
- Conducted thorough testing and debugging of new and existing programs
- Translated functional requirements into full-fledged, working application code

TekHero – Plano, Texas, USA June 2016 – February 2017
Senior Backend Developer

- Designed an entire 3000+ line backend architecture in Node.js
- Developed RESTful API endpoints for use with the frontend of the app
- Produced several application middleware solutions to accommodate needs not met by existing libraries

Application Webpage: http://tekheroapp.com

The University of Texas at Dallas – Richardson, Texas, USA May 2016 – February 2017
IT / AV Support Technician

- Provided technical support to over 400 faculty and staff members of the Jindal School of Management
- Serviced audio/visual systems in 40 classrooms throughout the school
- Manned the help desk and ensured all issues reached proper channels within the department

INDEPENDENT PROJECTS

Korean Transliterator November 2016 – December 2016

- Devised encoding system for one-to-one Latin script input to Korean script output
- Developed Java application to transliterate English keyboard input into Korean characters

Customer Order Management System October 2016 – November 2016

- Constructed a customer order database system with MongoDB and Node.js
- Created intuitive RESTful API endpoints for database interaction
- Implemented a JSON-token-based authentication system

Accounting General Ledger Database February 2016 – April 2016

- Dedicated 60+ hours to learning to use Node.js in conjunction with Express.js and MySQL
- Created a database model from scratch and incorporated it into a 640-line Node.js/Express backend
- Designed and styled web client using only HTML5, CSS3, and pure JavaScript (no frameworks)

Online Pong Game January 2012 – June 2012

- Worked on a team of 3 developers to produce a multiplayer, browser-based version of pong
- Experimented with canvas-based rendering and the new Dart language
- Developed low-latency game server for the game using Web Sockets in early version of Node.js

LEADERSHIP EXPERIENCE

Web Development Lessons May 2016 – July 2016

- Introduced web development technologies and strategies to small team of 6 computer science majors
- Led team through building their first front-end application in Angular in one week
- Guided each team member in their own exploratory projects as needed

UT Dallas Business Idea Competition September 2015 – October 2015

- Brainstormed idea for an innovative language learning application
- Handpicked 4 team members to aid in the process of app development
- Drafted full business plan with other colleagues in a matter of 2 weeks

LANGUAGES

- Native English, Fluent Spanish, Advanced French, Conversational Mandarin Chinese
